### DETAILED ACTION

Claims 1-8 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

As to p. 3, note "model" (line 2 from last) is not provided, and thus it is unexplained how the hookload is computed ("compute", line 7 or p. 4).

As to p. 4, how is stretch "computed" (line 14)? No algorithm is provided.

As to p. 5, if there is an "increase" (line 4) in stretch, how can the bottom of the hole appear to be "shallower" (line 6)? If the pipe stretches, wouldn't the bottom appear to be deeper?

As to p. 5, exactly what "data" (line 17) has been corrected, and how has it been "corrected" (line 17)?

As to p. 5, "calculated" (line 20) how?

Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claim 1, "the locations" (line 3 from bottom) lacks antecedent basis. How does "measured data" (lines 2 from last) have "depths corrected" (last line) mean? Should "having" (line 2 from last) read --in having--?
